Objective Career

To obtain a position with a progressive web development or software development company with a strong focus on creativity and problem solving. To find a position that is challenging, rewarding and provides an opportunity to expand my knowledge and abilities in creating client centric solutions.

Education

2004 – 2007	BSc of Computer Information Systems
	Amman Private University - Amman, Jordan
2000 – 2002	Diploma of Computer Science.
	Al-Almeyyah Institute - Abha, Kingdom of Saudi Arabia

Work Experiences

Nov 2017 - now — **Web / Mobile Applications Manager At Almeshaleyyah**
Working as web developer, and API, Back-end CMS for Company projects.

Jan 2015 - Jan 2017 — **Web / Mobile Developer At Arab Computers Systems**
Working as a Contract Software Developer for Web portal, Internal Applications, and Mobiles applications for Authority of Makkah Development.

Apr 2010 - Feb 2015 — **Web developer in Hafil Transportation Co.**
Apply a wide breadth of technical skills, Internet knowledge, and experience across the spectrum of online development in the service of building and improving online properties for multiple applications. Includes: site architecture and infrastructure, backend development using open source toolset, front end development, organic search engine optimization and strategy, web systems administration, technical writing, marketing communications and online business consulting.

Mar 2008 - Aug 2009 — **Web Developer in Tatweer Co.**
Working as Frontend Developer / Client Support Associate for a small startup company; tasked with managing my time between enhancing the current platform, supporting the entire client base of over 300 and contributing to the development of a new platform.
Assessing client's requirements and implementing practical solutions to problems. Supporting and organising my team in scheduling projects; while maintaining a high standard of customer focus. Manage and maintain numerous complex websites for clients. Initiating an internal company-wide transition to a faster, more efficient data management system; custom built to reduce maintenance costs and allow flexibility for future expansion.

Oct 2007 - Feb 2008 — **Web programmer in Circles Co.**
Working as web programmer, web administration, and custumize wordpress CMSs.

Note:
I worked for one year approximatlly in some Companies not listed above, each one between 2 - 4 months.
